

KMW and Elbit Systems intensify Rocket Artillery Cooperation

Munich, November 2022 – After having signed an MoU (Memorandum of Understanding in June this year, Krauss-Maffei Wegmann (KMW), Ulm based defence company Elbit Systems Deutschland and Elbit Systems Land have agreed to intensify their strategic cooperation.

Background is the modernisation and the capability extension of the European Multiple Launch Rocket System (MLRS / MARS II). Elbit provides a modern effector portfolio, to fully comply with the MLRS-user demands from extended range rockets to new training ammunition which will enable the user to “train as you fight” on national proving grounds.

KMW and Elbit have established the concept “EuroPULS” for the next generation European Long Range Rocket Artillery as the successor system for the MLRS. This concept has already been offered to the first European customers. The EuroPULS system is based on Elbit Systems’ operational and in-service Precise & Universal Launching System (PULS) and a range of precision guided munitions. KMW complements the EuroPULS with decades of know-how as system house and vast experience in building and customizing (rocket) artillery systems complying European standards. This provides the capability to integrate every rocket according to user’s requirements. Both companies envision a local rocket production to ensure Europe’s independence. This means a Future Rocket Artillery System made in Europe.

Yehuda (Udi) Vered, General Manager of Elbit System Land, commented: “I am confident that the EuroPULS will provide effective and timely solution for both the operational and industrial needs of European countries. I am encouraged by the level of interest this initiative is already drawing from European and NATO countries.”

“I welcome the cooperation with Elbit. In this partnership, we see a chance to underline the potential of our artillery capabilities. The potential opportunities allow KMW to become one of the most

modern system houses for rocket artillery”, comments **Ralf Ketzel, Chairman of the KMW Management Board.**

Krauss-Maffei Wegmann, a member of the German-French defense technology group KNDS, leads the European market for highly protected wheeled and tracked vehicles. At locations in Germany, Brazil, Greece, Hungary, Singapore, the United Kingdom and the USA more than 4.000 employees develop, manufacture and support a product portfolio ranging from air-transportable, highly protected wheeled vehicles through reconnaissance, anti-aircraft and artillery systems to main battle tanks, infantry fighting vehicles* and bridgelaying systems. In addition, KMW has wide-ranging system competence in the area of civil and military simulation, as well as in command and information systems and remote-controlled weapon stations with reconnaissance and observation equipment. The armed forces of more than 50 nations worldwide rely on tactical systems by KMW.
