Denmark procures Leguan bridge-layers

Munich, 12 December 2019 – The Danish Defence Acquisition and Logistics Organization (DALO) has signed an agreement with Krauss-Maffei Wegmann (KMW) for the procurement of seven Leguan bridge-layer systems on Leopard 2 chassis on 12 December 2019. The order comprises a total of six Leguan systems, a comprehensive periphery package, training simulators and an additional carrier vehicle. Shipping of the bridge-layers will begin at the end of 2022.

This makes Denmark the ninth nation to switch to the powerful new Leguan-Leopard 2 generation and take advantage of this system's high performance and reliability and unique interoperability.

The Leguan is capable of transporting and laying one 26 metre long bridge or alternatively two bridges with a length of 14 metres each under combat conditions.

In total, armies from 19 different countries use the Leguan bridge-layer system on a wide variety of mobility platforms.

Krauss-Maffei Wegmann, a member of the German-French defense technology group KNDS, leads the European market for highly protected wheeled and tracked vehicles. At locations in Germany, Brazil, Greece, Mexico, Singapore, the United Kingdom and the USA more than 4.000 employees develop, manufacture and support a product portfolio ranging from air-transportable, highly protected wheeled vehicles (MUNGO, AMPV*, DINGO, GFF4 and BOXER*) through reconnaissance, anti-aircraft and artillery systems (FENNEK, GEPARD, Remote Controlled Howitzer 155, Armoured Howitzer PzH2000, DONAR* and AGM) to main battle tanks (LEOPARD 1 and 2), infantry fighting vehicles (PUMA*) and bridgelaying systems. In addition, KMW has wide-ranging system competence in the area of civil and military simulation, as well as in command and information systems and remote-controlled weapon stations with reconnaissance and observation equipment. The armed forces of more than 50 nations worldwide rely on tactical systems by KMW.
